

Curriculum Policy

Purpose

To outline the policy regarding suggested core content reading assignments and the required number of core content (Rosh Review) quizzes to be completed.

Responsibilities

The PA residents are required to answer the 500 questions in the 18 month residency with a passing rate of 70%. It is recommended that the residents choose 10 questions per exam in an organ system/topic. The suggested readings list includes the reading assignments for the required quizzes and a recommended reading list for topics that will not be required for graduation with the understanding that the list is comprehensive and may be time prohibitive.
