

Curriculum Policy

Purpose

To outline the policy regarding suggested core content curriculum assignments and the required number of core content (Rosh Review) quizzes to be completed.

Responsibilities

The PA residents are required to answer the 500 questions in the 18 month residency with a passing rate of 70%. In addition, Foundations I quizzes are assigned each month based on the systems based topic being covered in conference. The suggested curriculum includes the paired Foundations of Emergency Medicine systems based content for the required quizzes, and a recommended reading list from Tintanelli's Emergency Medicine that will not be required for graduation with the understanding that the list is comprehensive and may be time prohibitive.
