Schedule changes and trades

The PA residency follows the Resident Review Committee-EM guidelines which require one 24-hour period off in every 7 days.

Physician Assistant Residents-1st year may only switch with another Physician Assistant Residents 1st year. Physician Assistant Residents-2nd year may only switch with another Physician Assistant Residents 2nd year. Physician Assistant Residents-2nd year may switch with a Physician Assistant Staff Member, upon request, with the approval of the program director. However, this type of request is discouraged and is considered on a case-by-case circumstance.

Exceptions must be approved by the residency director or designee.

The program director will review all requests in a timely manner and notify the resident of approval or disapproval. Residents should not make any firm travel/social plans until approval has been received. Shift trades resulting in more than 7 ED shifts in a row will not be approved. ED shifts worked during off-service rotations will generally not be approved. Special prior approval must be obtained through the program director or designee.

Procedures

Trades:

1. The EM PA resident who initiates the change contacts the program coordinator for approval.
2. The program coordinator will notify the program director via phone (same or next day trades) or e-mail.
3. The PA residency coordinator will update the weekly schedule on EDNet.
