

# Procedure Log

## Purpose

An Emergency Medicine Procedure log is required of all residents. The Residency Management System (New Innovations) allows tracking of all procedures performed. Residents are responsible for the entry and accuracy of this information. The following are the core procedures that need to be documented.

## Responsibilities

The following procedures must be documented in the residency procedure log.

- Cardiac pacing
- Central venous Access
- Chest tube
- Cricothyrotomy
- Dislocation reduction
- Intubations
- Lumbar puncture
- Pericardiocentesis
- Procedural sedation
- Vaginal delivery
- Resuscitation-Adult Medical
- Resuscitation-Adult Trauma
- Resuscitation-Peds Medical
- Resuscitation-Peds Trauma

The procedure log is located at [www.new-innov.com](http://www.new-innov.com). Residents are responsible for tracking and entering their procedures. Procedures done during the procedure lab, simulation, workshops, small groups, or in other venues should also be entered in the log.

Ultrasounds are tracked separately through the US machines, EPIC and logbook.
